

Product Change Notification

PCN Publish Date: July 24, 2006

PCN #: 002557-043679

Change Title: Product Process Change

Products Affected:

Current Aavid Part Number	368052B00067
New RoHS Compliant Part Number	368052B00067G RoHS  Compliant

Description of the Change: : In an effort to make our product line more compatible with regulatory and environmental guidelines, we are changing the volume manufacturing process for our products to make them RoHS compliant according to Aavid Thermalloy specification RoHS 9000. (Available at <http://www.aavidthermalloy.com/RoHS.shtml>).

The current version of this product is finished with yellow zinc which contains hexavalent chromate. The RoHS compliant version will use a zinc finish with trivalent chromate. Product built using this new material is identified with a "G" suffix at the end of the part number as shown above in Products Affected.

Scheduling of Change:

Sample Date: Please contact your local sales representative for sample availability.

Volume Production: Volume production will be available August 23, 2006. New orders should be placed for the "G" suffix product. Please adjust your current orders so that they can be filled accordingly depending upon stock and availability.

EOL of Unchanged Product: Once manufacturing has been converted to the RoHS compliant process, it may still be possible to manufacture products with non-compliant materials. However, products manufactured with non-compliant materials may require a pricing adjustment due to the cost increases associated with lower volume manufacturing.

Customer Impact: The functionality of the new hardware will be equivalent.

Qualification Results: For an Aavid Thermalloy qualification reports visit our RoHS website. <http://www.aavidthermalloy.com/RoHS.shtml>

Aavid Thermalloy LLC
70 Commercial St.
Concord, NH 03301
