

Product Announcement

Aavid Thermalloy, LLC Introduces Turbo Flow Ultra High Performance Cold Plates for Power Applications

Concord, NH, USA, February 23rd, 2007 – Aavid Thermalloy, LLC, the world leader in thermal solutions for cooling electronics and your partner of choice for next generation solutions has announced the availability of ultra high performance, Turbo Flow cold plates for power applications.

Turbo Flow Ultra High Performance Cold Plates are designed to cool the latest high density IGBT's. Aavid's latest cold plates increase the surface area in contact with the cooling fluid by channeling fluid through uniquely configured flow paths. The result is a cold plate with superior thermal performance and a lower pressure drop than competing cold plates. Lower pressure drop means less demand on the fluid circulation system and allows engineers to reduce overall system cost. Turbo Flow cold plates are easily configured for custom applications. Length and width can be varied and the fluid flow path can be altered. Our application engineers can optimize the flow patterns by steering fluid toward hot spots while providing necessary space for device mechanical attachment. The cold plates are manufactured from aluminum and

constructed using vacuum brazing for leak free and contamination free operation. RoHS compliant AavSHIELD finishes are available for corrosion protection. To learn more about how turbo Flow can increase performance and reduce your system cost, visit our web site at www.aavidthermalloy.com/products/liquid/index.shtml

Pricing and Availability – Prices start at \$215.19 for OEM quantities of 100 pcs and samples are available upon request. Production quantities are attainable with standard lead times of 6-8 weeks.

About Aavid Thermalloy, LLC

Aavid Thermalloy, LLC is the world's leading supplier of thermal management products, which include heat sinks, interface materials and attachment accessories, fan heat sinks, heat pipe assemblies, liquid cooling and phase change devices that are configured to meet customer specific needs. Aavid Thermalloy's products are used in an expanding number of computer, networking and industrial electronics applications; including computer systems (desktops, laptops, disk drives, printers and peripheral cards), network devices (servers, routers, set top boxes and local area networks), telecommunications equipment (wireless base stations, satellite stations and PBXs), instrumentation (semiconductor test equipment, medical equipment, and power supplies) transportation and motor drives (braking and traction systems) and consumer electronics (stereo systems and video games).
